TECHNOLOGY

We build connections that last—from technology to our communities to our team.

We are a technology company that has been serving Omaha businesses for 25 years, including some well-known organizations like, Nebraska Furniture Mart, QLI (Quality Living Inc.), Rotellas and many more. We design, implement and support local and wide area network solutions, including software development to help streamline various internal functions. At Turner Technology, *we focus on the people, the process, then the technology* that best helps you and your staff work more efficiently.

We see technology as a tool that makes your job easier. It simplifies processes. Helps you communicate. It moves your business forward. We know technology. We also know that the technology isn't as important as the job that needs to be done and the people doing it. Our ability to understand who you are and what you do means that we'll also match the right technology to the job you need to get done.

We work together internally and with our clients to create solutions that not only meet your needs; they help prepare you for what's next. The best part is that, although we love technology, we don't speak that language with you. Your solutions can only work if you understand what it does for your business. And we're here to help connect the dots between you, your team and your technology.

COMMUNITY INVOLVEMENT

At Turner Technology, we feel that giving back to the community is part of who we are. We support various organizations through donations and company participation throughout the year. Some of our activities include:

- Served dinner to homeless families at Sienna Francis House and Open Door Mission.
- Served families at Ronald McDonald House, Methodist Hospital and Rainbow House-Children's Hospital.
- Supported Channel 7 efforts to fill backpacks with school supplies.
- Donated and packaged food items through Heartland Food Bank.
- Every Thanksgiving, company fund drive to collect money to support buying turkey dinners through local churches.
